PROFESSIONAL SUMMARY

Final-year B.Tech student in Electronics and Communication Engineering (CGPA 8.0) and aspiring Software Engineer with strong foundation in analysis, design, programming, debugging and testing of applications. Hands-on experience in Python development, Object-Oriented Programming, Data Structures & Algorithms, REST APIs, full-stack application development, Embedded Systems, IoT and VLSI Design. Skilled in writing clean modular code, performing debugging and testing, preparing technical documentation, and collaborating to understand system requirements. Proficient with Git, GitHub and generative AI tools (ChatGPT, Microsoft Copilot). Seeking a Software Engineer / Embedded Systems role to contribute to reliable application design, development and maintenance.

TECHNICAL SKILLS

Programming & Design: Python, C, Object-Oriented Programming (OOP), Data Structures & Algorithms, Verilog, Code Design, Debugging, Testing
Web & Backend: Django, React, REST APIs, HTTP Methods, JSON, Client-Server Architecture, Backend Development, Application Development
Database: SQL, MySQL, SQLite3, CRUD Operations, Relational Databases, Data Handling & Processing
Hardware & Embedded: Embedded C, IoT (MQTT / Wi-Fi / Sensors), GPIO / UART, PCB Design (Schematic → Fabrication), VLSI / RTL Design, DSCH, Microwind, MATLAB, LabVIEW, PCB Wizard, Livewire
Tools & Practices: Git, GitHub, VS Code, Software Development Life Cycle (SDLC), Documentation, Code Optimization, Version Control
Emerging Tech: Generative AI Tools (ChatGPT, Microsoft Copilot), Machine Learning Basics (ANN), Digital Fluency
Soft Skills: Analytical Thinking, Problem Solving, Requirements Gathering, Collaboration, Communication, Continuous Learning, Methodical Verification

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering <i>Sir C R Reddy College of Engineering, Eluru 2023 – 2027</i>	CGPA: 8.0
Intermediate (MPC) <i>Sir C R Reddy Inter College, Eluru 2021 – 2023</i>	88.2%
Secondary School (Class X) <i>St. Xavier's T.M High School, Eluru 2020 – 2021</i>	96%

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — IntrnFort • Conducted analysis, design and programming of full-stack web application features using Python, Django, REST APIs and SQLite3. • Wrote clean, modular code; performed debugging, testing and troubleshooting to ensure application reliability and performance. • Built and integrated REST APIs for frontend-backend communication; handled database operations and structured data management. • Prepared technical documentation and followed coding standards; collaborated to understand requirements and deliver maintainable solutions.	June 2024 – September 2024
Embedded Systems Intern — TechLogic IT Solutions Pvt. Ltd. • Programmed and debugged embedded C applications for microcontroller-based systems, interfacing sensors and peripherals via GPIO/UART. • Assisted in developing and testing embedded application logic, contributing to hardware-software integration tasks under senior engineer guidance.	May 2026 – July 2026
Internet of Things Intern — BIST Technologies Pvt. Ltd. • Worked on IoT device architecture, integrating sensors and communication protocols (e.g., MQTT/Wi-Fi) for connected-device data flow. • Contributed to hardware-software integration tasks, translating sensor data into actionable outputs for IoT-based applications.	May 2025 – July 2025

PROJECTS

Open-Source Job Portal | Python | Django | REST APIs | SQLite3 | React
• Designed and developed a full-stack job portal application with Django backend and React frontend, implementing REST APIs for core features.
• Performed programming, debugging and testing of application modules; integrated SQLite3 for data storage and ensured reliable data handling.
• Applied modular design principles and coding standards to deliver maintainable code and clear technical structure.

Email Spam Detection System | Python | Artificial Neural Network | Machine Learning | Data Preprocessing
• Designed and programmed an email classification system in Python using Artificial Neural Network to detect spam vs legitimate messages.
• Completed data preprocessing, feature extraction, model training, testing and evaluation; validated predictions across multiple test inputs.

8-bit RISC Processor Core | Verilog | Computer Architecture | RTL Design | RTL Verification
• Designed and verified an 8-bit RISC core with a custom 16-instruction ISA, Harvard architecture, and a FETCH-DECODE-EXECUTE-WRITEBACK control FSM.
• Built modular, self-checking testbenches with VCD waveform verification, achieving 100% passing test coverage across all RTL blocks.

Light Activator Switch – Circuit Design to PCB Fabrication | Circuit Simulation | Schematic Design | PCB Wizard
• Designed and simulated a light-activator switch circuit using PCB Wizard; converted schematic design into a working single-layer PCB layout.
• Completed end-to-end flow: circuit design → simulation → PCB fabrication → testing.

CERTIFICATIONS

• Python — GeeksforGeeks | 2026 • C Programming — SkillUp by Simplilearn | 2025
• Hands-on PCB Design (From Concept to Circuit) — Sir C R Reddy College of Engineering in association with Inventronix | Aug 2025

ACHIEVEMENTS

• JNTUK Inter-Collegiate Chess Championship — Winner (2024): Secured first place competing against participants from multiple affiliated colleges — reflecting strong strategic planning, pattern recognition and focused decision-making under pressure.

CODING PRACTICE & TOOLS

• Regularly practice Data Structures and Algorithms in Python with focus on problem analysis, efficient design and clean coding.
• Use Git and GitHub for version control; leverage generative AI tools (ChatGPT, Microsoft Copilot) for code assistance, documentation and learning.
• Continuously improve programming, debugging, testing and software development skills through hands-on projects and practice.
